## HOSPITAL WORKFLOW BLUEPRINT

### 1. CORE PATIENT JOURNEY

Patient registration → Appointment / emergency arrival → Consultation / triage →  
Diagnosis → Lab / radiology / procedures → Prescription / medication →  
Admission if needed → Nursing care → Billing / insurance / payment →  
Discharge summary → Follow-up.

### 2. RECEPTION / REGISTRATION WORKFLOW

- Register new patients
- Search existing patients
- Create appointments or same-day visits
- Generate token / queue number
- Collect registration / consultation fees
- Guide patient to department, doctor, or emergency

### 3. APPOINTMENT AND CHECK-IN WORKFLOW

- Book appointment through reception or portal
- Confirm doctor schedule and slot
- On arrival, check in the patient
- Generate queue token
- Update status: booked, checked in, waiting, with doctor, completed

### 4. OPD WORKFLOW

- Patient waits in queue
- Nurse / assistant records vitals
- Doctor reviews history, symptoms, vitals
- Doctor writes diagnosis, treatment plan, prescription
- Doctor orders tests if needed
- Patient is discharged from OPD with advice or follow-up

### 5. EMERGENCY WORKFLOW

- Fast registration with minimum data
- Triage by urgency
- Emergency bed assignment
- Emergency treatment, tests, medication, observation
- Outcome: discharge, admission, transfer, surgery, referral, or death case workflow

### 6. ADMISSION WORKFLOW

- Doctor requests admission
- Admission desk checks bed availability
- Patient / family selects room type if options exist
- Deposit collected if required
- Bed assigned
- Floor reception and nurse station notified
- Patient arrives at room / bed

- Nurse confirms admission and starts care

#### 7. BUILDING / FLOOR / ROOM / BED WORKFLOW

- Building contains floors
- Each floor has nurse station and floor reception
- Each floor contains wards, rooms, and beds
- Bed status must be visible: available, occupied, reserved, cleaning, maintenance, isolation, transfer pending
- Patient bed assignment and transfer are fully tracked
- Room/bed cleaning and maintenance workflows are linked

#### 8. NURSING WORKFLOW

- Admission intake assessment
- Vitals recording
- Medication administration
- Nursing notes
- Intake/output chart
- Critical alerts
- Shift handover
- Transfer/discharge preparation

#### 9. DOCTOR ROUND WORKFLOW

- Doctor reviews admitted patient
- Views vitals, notes, labs, imaging
- Updates diagnosis and plan
- Orders medication, tests, procedures
- Writes progress note
- Decides discharge, transfer, ICU escalation, or surgery

#### 10. LAB WORKFLOW

- Doctor orders tests
- Billing/payment verification if needed
- Sample collection
- Test processing
- Result entry
- Pathologist / approver verification
- Critical result notification
- Report release to doctor/patient

#### 11. RADIOLOGY WORKFLOW

- Imaging order created
- Scheduling / payment
- Scan performed
- Report drafted and approved
- Image/report linked to patient record

#### 12. PHARMACY WORKFLOW

- OPD prescription dispensing
- IPD medicine issue to ward/patient
- Batch / expiry management
- Stock deduction
- Low stock alerts

- Return / adjustment workflow

### 13. BILLING WORKFLOW

- OPD service billing
- IPD running billing
- Advance payments
- Discount approvals
- Refunds
- Insurance / corporate billing
- Final bill clearance at discharge
- Daily cash closing

### 14. SURGERY / OT WORKFLOW

- Surgery request
- Pre-op clearance
- OT slot booking
- Team assignment
- Operation record
- Post-op recovery
- Consumables and charges update

### 15. DISCHARGE WORKFLOW

- Doctor discharge decision
- Nurse prepares discharge
- Billing prepares final bill
- Pharmacy / inventory reconciliation
- Discharge summary generated
- Patient leaves
- Bed status moves to cleaning and then available

### 16. ADMIN / REPORTING WORKFLOW

- Hospital dashboards
- Patient flow statistics
- Occupancy and revenue reports
- Department performance
- Pending bills, critical alerts, lab/pharmacy workload

### 17. FUTURE AI-ASSISTED WORKFLOWS

- Doctor note drafting
- Discharge summary generation
- Lab result explanation
- Billing anomaly detection
- Inventory demand prediction
- Patient support chatbot

### CONSULTATION CHECKLIST

When validating with hospital staff, confirm:

- Registration steps
- OPD flow
- Emergency flow
- Bed assignment and transfer

- Nursing duties and handover
- Lab and radiology report flow
- Billing and discharge clearance
- Housekeeping and maintenance coordination
